

MEMORANDUM

NASSAU COUNTY DEPARTMENT OF HEALTH

240 Old Country Road

Mineola, New York 11501

To : Theodore B. Burger

Date: October 8, 1974

From : John F. Welsch

Subject : Photo Circuit, Glen Cove - Sewer Connection

In order to answer any questions on the above mentioned facilities, I believe we have to look at the overall picture of the Glen Cove problems. I will try to list them below:

1. Photo Circuit- present time discharging to sewer system. Pre-treatment does not appear to be satisfactory. Present flow 431,000 gpd.
2. Li Tungston- present time discharges to Glen Cove Creek. Wishes to eventually discharge treated waste to sanitary sewer system - 70,000 gpd.
3. Power Chemco- Present time discharges to Glen Creek. After pre-treatment for removal of metals hopes to discharge to sanitary sewer system for removal of other constituents - 81,000 gpd.

In the draft permit issued by the EPA, Photo Circuit was identified as a firm discharging into the sewer system to be monitored. I also believe that Mr. Hammond is looking for standards which will have to be met in order to discharge to the sewer. At present, I do not have any standards for this; I believe the city sewer ordinance will cover this matter.
